|
2010

BSc, Psychology (1st, 73%)

University of Exeter

SELECTED INDUSTRY EXPERIENCE

2017
|
2016

Product Owner

AIMIA

📍 London, UK

- Reporting into the Product Director, key responsibilities included:
 - Driving the development of a global analytics platform, from concept to delivery.
 - Owning the developmental backlog; defining and prioritising scope.
 - Feature sign off.
 - Daily standups to monitor and celebrate progress within sprints.
 - Communicating updates to stakeholders.
 - Liaising with teams across the business to inform requirements.
 - Working alongside six developers and four test analysts in bi-weekly sprints.
 - Communicating risk, progress, and providing direction on the overall sprint goal.

2016
|
2015

Business Analyst / Product Consultant

Financial Express

📍 London, UK

- Driving the development of a productised web-based platform, managing elements similar to the product owner role cited above.
- Within this role I was also responsible for creating and maintaining product specifications, training of new team members, and for aiding pre-sales support through the provision of gap analyses, product demos and attendance at client meetings.

2015
|
2013

Account Manager

Financial Express

📍 London, UK

SELECTED ACADEMIC EXPERIENCE

Current
|
2021

Research Associate & Statistician

King's College London

📍 London, UK

- Working collaboratively with the multidisciplinary research team. Focussing primarily on the statistical components of clinical trials and the development of trials-based methodology.

2021
|
2018

Graduate Teaching Assistant

King's College London

📍 London, UK

- Module lead for the 'Big Data Analytics in Python' mini-module. Teaching materials are openly accessible via my [github](#).
- Teaching assistant in research methods modules and [R workshops](#).

DATA CHALLENGES

2022
|
2020

TidyTuesday weekly social data challenge

R for Data Science

📍 Remote

- A weekly social data challenge conducted using R and the tidyverse.
- A number of entries produced across both 2020 and 2022
- Output and code for latest entry available at: github.com/jodielord/TidyTuesdays/2022/2022-Feb-dog-breeds

2020

DPUK Datathon

Dementias Platform UK

📍 Remote

- Project produced: Predicting latent cognitive trajectories in the English Longitudinal Study of Ageing using SEM and cluster-based algorithms.

CV made with the R package
[pagedown](#).

Code available at
github.com/jodielord/cv.
